

# Standby Uninterruptible Power Supply (UPS)

This standby UPS provides backup power in case of power outages. It offers surge protection and voltage regulation for connected devices like computers and workstations.

## Overview

### Reliable Backup Power Solution

This standby Uninterruptible Power Supply (UPS) is designed to provide essential backup power during unexpected outages, ensuring continuous operation for sensitive electronic equipment. It offers integrated surge protection and voltage regulation, safeguarding connected devices against electrical anomalies. With a capacity range of 500VA to 1500VA, it is an ideal solution for desktop computers, workstations, and similar office electronics, allowing users to safely save work and shut down systems to prevent data loss.

## Technical Specifications

### Capacity Range

**500 VA**

Minimum Capacity

**1500 VA**

Maximum Capacity

### Protection Features

Surge Protection, Voltage Regulation, Overload Protection, Battery Backup

## Features & Alarms

### Operational Alerts

- Audible alarms for power status
- Safe shutdown capability
- Hardware damage prevention

## Compatibility

### Suitable Applications

Desktop Computers • Workstations • Sensitive Electronics
