

Standing Pedestal Fan with Adjustable Height

This standing pedestal fan provides cooling and air circulation in indoor environments. It features a circular fan head with a protective grille, three fan blades, and a control panel on the central support column.

Product Overview

High-Performance Pedestal Cooling Solution

This standing pedestal fan is engineered to provide efficient air circulation and cooling for indoor environments. It features a sturdy circular base for enhanced stability and a telescopic pole that allows for precise height adjustments to suit various settings. Designed with a protective grille and a user-friendly control panel on the central column, this unit combines safety, convenience, and performance for professional or residential use.
