Product Overview

Versatile Submersible Water Pump

This clean water submersible pump is a compact and portable solution designed for efficient drainage and irrigation tasks. Featuring an integrated float switch for automatic level control and an intelligent motor protection system, it ensures reliable operation even in challenging environments. It is ideal for a wide range of applications including garden irrigation, aquarium maintenance, and emergency water removal in both residential and mine enterprise settings.

Key Features

Automation & Safety

- Automatic float switch level control
- Thermal overload protection
- Overcurrent protection
- Grounding conductor for electrical safety

Safety Compliance

Grounding-type attachment plug, Overheat protection, Electrical shock prevention

Operational Details

Applications

- Aquarium water circulation
- Mine enterprise water drainage
- Garden irrigation
- Family spray and irrigation
- Flooded area drainage

Operational Warnings

Do not operate outside of water • Do not operate with insufficient water
