

Star-Shaped LED Filament Lamp

This LED filament lamp features a unique star-shaped design, providing a decorative and energy-efficient lighting solution. The lamp utilizes LED filament technology to mimic the appearance of traditional incandescent bulbs while offering significantly lower power consumption and longer lifespan.

Product Overview

Star-Shaped LED Filament Lamp

This unique star-shaped LED filament lamp combines decorative aesthetics with advanced lighting technology. Designed to mimic the classic look of incandescent bulbs, it offers significant energy savings and a long lifespan of over 80,000 hours. Ideal for creating ambient atmospheres in retail, hospitality, or residential spaces, this lamp is both eco-friendly and easy to install with a standard base.

Technical Specifications

Light Source	Epistar SMD LED
Power Factor	0.95 PF
CRI	80
Lifespan	80000 hours

Features & Benefits

Key Advantages

- Instant start with no flickering
- Eye-protective gentle light
- 95% energy saving compared to CFL
- High light efficiency
- Easy installation

Environmental Compliance

No Mercury, No UV Radiation, No IR Radiation, EMI Free

Installation

Base Compatibility

E26 • E27
