

Stationary Drill Press for Metal and Wood

This stationary drill press is used for drilling precise holes in materials like wood and metal. It features an adjustable table and a hand-operated lever for controlled drilling.

Overview

Professional Stationary Drill Press

This stationary drill press is a versatile machine tool designed for precision drilling in both metal and wood workpieces. It features a robust construction with a stable base, column, and an adjustable table that can be moved vertically or angled to suit various workpiece sizes. Offering significantly greater accuracy and control than handheld alternatives, it is an essential tool for professional workshops requiring consistent and reliable drilling performance.
