

Steam Generator Iron with Separate Water Tank

This steam generator iron features a separate water tank for extended use. It is designed for efficient and high-quality ironing, suitable for both home and professional use.

Product Overview

Professional Steam Performance

This steam generator iron is engineered for high-efficiency garment care, featuring a dedicated high-capacity water tank that allows for extended ironing sessions without frequent refills. The unit is designed with a professional-grade durable soleplate and a tactile cork handle, ensuring both durability and comfort during prolonged use. With intuitive controls and clear indicator status lights, this device provides a seamless and reliable experience for both domestic and professional environments.
