

Steel Axe with Manchurian Ash Handle

This axe features a hardened steel head for splitting wood and other heavy-duty tasks. Its handle is crafted from Fraxinus mandshurica (Manchurian ash), providing strength and shock resistance.

Product Overview

Heavy-Duty Steel Axe

This professional-grade axe features a hardened steel head engineered for efficient wood splitting and heavy-duty forestry tasks. It is paired with a durable handle crafted from Fraxinus mandshurica (Manchurian ash), renowned for its exceptional strength and shock-absorbing properties. Designed for both woodworking and general outdoor applications, the tool combines a precision-ground edge with an ergonomic grip to ensure safety, durability, and reduced user fatigue during extended use.

Technical Specifications

Head Finish

Painted Red • Corrosion Resistant

Head Material

Hardened Steel

Handle Material

Fraxinus mandshurica (Manchurian Ash)

Key Features

Design Benefits

- Precision-ground cutting edge for optimal sharpness
- Ergonomic handle design for comfortable grip
- Shock-resistant handle construction
- Secure head-to-handle fitting for safe operation

Suitable Applications

Forestry, Woodworking, Heavy-duty splitting, Outdoor applications
