

Steel Bar Bending Machine - 6-55mm Rebar Capacity

This steel bar bending machine is designed for rebar processing with a capacity of 6-55mm. It features a maintenance-free spindle, enclosed electric cabinet, and double-sided operation for efficient use.

Overview

Industrial Steel Bar Bending Machine

This heavy-duty rebar bending machine is engineered for precision and durability in demanding industrial environments. Featuring a maintenance-free spindle, enclosed moisture-proof electric cabinet, and high-strength alloy steel components, it ensures consistent accuracy and long service life. Its double-sided operation and thickened dashboard enhance workflow efficiency, making it an ideal choice for large-scale construction and manufacturing projects.

Features

Key Features

- Maintenance-free spindle assembly
- Double-sided operation for increased efficiency
- Enclosed electric cabinet for moisture and dust protection
- Heavy-duty disc and square steel frame
- Rotary oil-way for convenient maintenance
