

# Steel Bar Straightening Machine

This steel bar straightening machine is designed for efficient straightening of steel bars. It features a robust construction and multiple rollers to ensure precise straightening.

## ADDITIONAL IMAGES

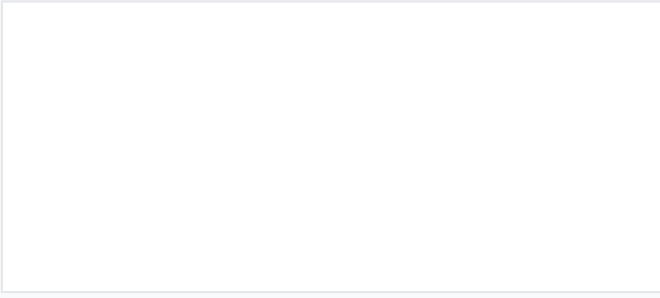

## Product Overview

### High-Efficiency Steel Processing

This fully automatic CNC steel bar straightening and cutting machine is engineered for precision and reliability in high-volume industrial environments. Designed to handle steel bars ranging from 4mm to 14mm, it utilizes advanced automated control systems to ensure consistent straightening and accurate cutting. Its robust, mobile design makes it an ideal solution for construction sites and large-scale steel processing facilities looking to optimize their workflow.

## Technical Specifications

Model	GTQ 4-14
Working Capacity	4-14 mm
Motor Power	26 kW (380V, 3-Phase)
Net Weight	1250 kg
Dimensions (L x W x H)	2500 x 800 x 1000 mm

## Commercial Details

Warranty Period	2 Years
Minimum Order Quantity	1
Certifications	ISO, SGS, 3C
