

Steel Blade Shovel with Fiberglass Handle

This general-purpose shovel features a durable steel blade and a yellow fiberglass handle. It is suitable for digging, moving, and lifting materials in gardening, landscaping, and construction applications.

Product Overview

Professional Grade Utility Shovel

This general-purpose shovel is engineered for reliability in demanding environments such as gardening, landscaping, and construction. Featuring a robust steel blade paired with a resilient yellow fiberglass handle, it provides the perfect balance of strength and maneuverability. The ergonomic D-grip design ensures user comfort and control during repetitive tasks like digging, moving, or lifting heavy materials.
