

Steel Butt Welding Pipe Fittings

Steel butt welding pipe fittings facilitate permanent connections in piping systems. These fittings ensure structural integrity and efficient flow within pipelines, especially in high-pressure and high-temperature environments.

Product Overview

Industrial Steel Butt Welding Fittings

These professional-grade steel butt welding pipe fittings are engineered for permanent, leak-proof connections in demanding piping systems. Manufactured to meet rigorous international dimensional and material standards, they ensure structural integrity in high-pressure and high-temperature environments. Suitable for diverse applications including oil, gas, and chemical processing, these components provide reliable flow control and system longevity.

Technical Standards

Available Wall Thickness

- SCH10S
- SCH40S
- SCH20
- STD
- SCH40
- SCH80
- SCH160

Supported Standards

ASTM B16.9, ASTM B16.28, MSS SP-43, DIN, GOST 17375, JIS

Materials

Material Specifications

- ASTM A234
- ASTM A403
- DIN 1626

Product Details

Available Configurations

90-Degree Elbows • 45-Degree Elbows • 180-Degree Returns • Tees • Reducers
