

Steel Connecting Flange

These industrial steel flanges are designed for connecting pipes, valves, pumps, and other equipment to form piping systems. They are engineered to withstand high pressure and temperature conditions, ensuring secure and leak-proof connections.

Product Overview

Industrial Steel Connecting Flange

These robust steel flanges are engineered to facilitate secure and leak-proof connections between pipes, valves, pumps, and other essential equipment within a piping system. Designed for demanding industrial environments, they offer exceptional durability and corrosion resistance. The precisely drilled bolt holes ensure straightforward installation, while the versatile design supports high-pressure and high-temperature operating conditions.

Technical Specifications

Performance Ratings

1 High

Pressure Resistance

1 High

Temperature Tolerance

Material

High-quality Steel

Installation Features

Precisely Drilled Bolt Holes, Easy Installation

Usage & Compatibility

Typical Applications

- Pipe connections
- Valve integration
- Pump systems
- Industrial piping networks

Key Properties

Corrosion Resistant • High Durability • Leak-proof
