

Steel Cross Pipe Fitting

This steel cross pipe fitting connects four pipes in plumbing and industrial systems. It is constructed from carbon and stainless steel to ensure secure, leak-proof connections for fluid or gas transfer.

Product Overview

Industrial Cross Pipe Fitting

This high-quality cross pipe fitting is designed for robust performance in industrial piping systems. Engineered to connect four pipes efficiently, this component ensures a secure and leak-proof seal for fluid and gas transfer applications. Its durable construction allows it to withstand demanding high-pressure and high-temperature environments.

Technical Specifications

Material	Carbon Steel, Stainless Steel
Fitting Type	Cross

Logistics & Terms

Shipping Ports

- Tianjin
- Shanghai

Payment Terms

L/C • T/T

Delivery Time	Within 30 days after contract signing
Packaging	Plywood Cases
