

Steel Floor Deck Roll Forming Machine

This machine efficiently produces steel floor decks with consistent quality. It shapes metal sheets into precise profiles for durable and robust flooring solutions in construction.

ADDITIONAL IMAGES

Product Overview

The machine features a robust construction with blue painted steel frames and a white control cabinet for precise process monitoring.

High-Efficiency Metal Decking Solution

This high-performance steel floor deck roll forming machine is engineered for the efficient and precise production of metal decking. Designed for durability and stability, it features an automated feeding system and a programmable logic controller for customized deck profiles. This machine is an ideal solution for high-volume construction projects requiring consistent, high-quality metal deck fabrication.

Condition

New

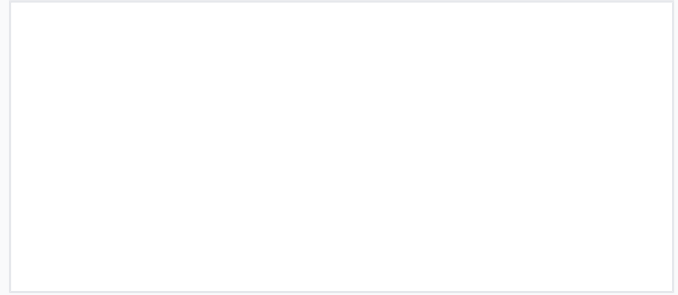

Marketing Type

New Product 2020

Technical Performance

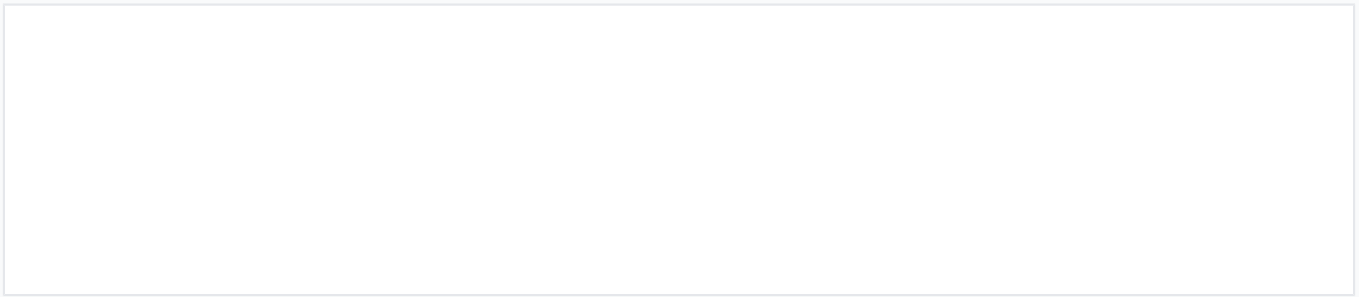

Heavy-duty rollers and guides ensure consistent forming quality for various steel gauges.

Precision engineered machine designed for high-speed operation and increased throughput.

Production Capacity	20pcs per mould
Primary Application	Non-load bearing partition walls
Core Components	PLC, MOTOR

Service & Support

Industrial equipment securely crated and palletized for safe international shipping.

After Warranty Service

- Video technical support
- Online support

Quality Assurance

Video outgoing-inspection provided • Machinery Test Report provided

Warranty of Core Components	1 Year
------------------------------------	--------

Industrial Context

Applicable Industries	Hotels, Building Material Shops, Machinery Repair Shops, Home Use, Construction works, Energy & Mining
Place of Origin	Zhejiang, China
