

Steel Frame Wheelbarrow with Pneumatic Tire

This wheelbarrow is designed for landscaping and construction tasks. It features a steel frame, a deep-capacity tray, and a pneumatic tire.

Product Overview

Robust Steel Frame Wheelbarrow

This durable wheelbarrow is engineered for demanding landscaping and construction environments. Featuring a heavy-duty steel frame and a high-capacity tray, it is designed to transport soil, gravel, and construction materials with ease. The integrated pneumatic tire ensures smooth maneuverability across uneven or rough terrain, providing reliable performance for professional tasks.

Technical Specifications

Load Capacity	150 kg
Weight	12 kg
