

Steel Frame Wheelbarrow with Pneumatic Tire

This wheelbarrow is designed for garden and construction tasks. It features a steel frame, a large-capacity metal tray, and a pneumatic tire for easy maneuverability.

Product Overview

Heavy-Duty Utility Wheelbarrow

This robust wheelbarrow is engineered for demanding garden and construction environments. Featuring a durable steel frame and a high-capacity metal tray, it provides the structural integrity needed for heavy-duty hauling. The inclusion of a pneumatic tire ensures smooth maneuverability across uneven terrain, making it an essential tool for transporting soil, gravel, and construction materials efficiently.

Key Specifications

Performance Highlights

1 Pneumatic

Wheel Type

Suitable Materials

- Soil
- Gravel
- Construction debris

Frame Material

Steel

Recommended Usage

Garden, Construction, Landscaping
