

Steel Garden Fork with D-Handle

This garden fork is designed for turning, aerating, and loosening soil. It features a durable steel construction and a comfortable D-handle for enhanced grip and control.

Product Overview

Durable Steel Garden Fork

This steel garden fork is an essential tool for professional landscaping and home gardening, specifically designed for turning, aerating, and loosening soil. Its durable steel construction ensures longevity, while the ergonomic D-handle provides enhanced grip and control during heavy-duty tasks. The specialized tines are engineered for efficient soil penetration and minimal adhesion, making it ideal for compost management and soil preparation.

Design & Ergonomics

Ergonomic Features

Enhanced Grip • Improved Control • Comfortable Handling

Handle Design

D-Handle

Material & Construction

Tine Characteristics

- Efficient soil penetration
- Minimal soil adhesion
- Heavy-duty construction

Material

Durable Steel

Applications

Recommended Tasks

Soil Turning, Aerating, Soil Loosening, Compost Turning, Soil Preparation
