

Steel Garden Hoe Head

This hoe head is designed for efficient soil cultivation and weeding. It features a robust steel construction for long-lasting performance.

Product Overview

Professional Grade Steel Hoe Head

This durable hoe head is engineered for efficient soil cultivation and weeding tasks. Constructed from robust steel, it ensures long-lasting performance in demanding gardening and landscaping environments. The blade is precision-sharpened to provide optimal cutting and digging capabilities for tilling, furrowing, and general soil preparation.

Technical Specifications

Weight Metric

700 g
Weight

Material	Steel
Model Identifier	NSK

Usage & Applications

Ideal Applications

- Soil Cultivation
- Weeding
- Tilling
- Furrowing
- General Soil Preparation

Key Features

Robust Construction • Sharpened Blade • Long-lasting
