

Steel Garden Pick with Wooden Handle

This garden pick features a forged steel head for enhanced durability. It is designed with a pointed end for breaking up hard soil and a flat end for digging and cultivation.

Product Overview

Professional Grade Garden Pick

This heavy-duty garden pick is engineered for durability and strength, featuring a high-quality forged steel head. It is designed with a versatile dual-end configuration, including a pointed end for breaking up hard soil and a flat end for efficient digging and cultivating. The sturdy wooden handle ensures a comfortable grip, making this tool an ideal choice for landscaping, gardening, and construction projects.
