

# Steel Garden Spade with Y-Grip Handle

This durable steel garden spade is designed for digging, planting, and moving materials in the garden. It features a robust steel blade for efficient soil penetration and a comfortable Y-grip handle for enhanced control and reduced strain.

## Product Overview

### Professional Grade Steel Spade

This durable steel garden spade is expertly designed for heavy-duty digging, planting, and material transport tasks. It features a robust, reinforced steel blade engineered for efficient soil penetration across various landscapes. The integrated Y-grip handle provides superior control and ergonomics, significantly reducing wrist strain during extended use.

## Technical Specifications

Material	High-grade steel
Handle Design	Y-grip
