

Steel Hand Truck for Material Handling

This steel hand truck is a robust material handling solution for industrial and commercial use. It is made from high-strength steel and has smooth-rolling wheels for easy maneuverability.

Product Overview

Industrial Material Handling Solution

The YB150C steel hand truck is a robust and versatile tool engineered for demanding industrial and commercial environments. Built from high-strength steel, it offers superior durability and high load capacity, ensuring reliable performance in warehouses, factories, and delivery services. Designed with ergonomic handle grips and smooth-rolling wheels, this truck maximizes efficiency while minimizing physical strain on operators.

Key Features

Material	High-strength steel
Suitable Applications	Warehouse, Factory, Delivery Services, Commercial Use

Performance

Key Operational Benefits

- Enhanced transport efficiency
- Reduced operator physical strain
- Secure load platform
- Comfortable ergonomic handle

Maneuverability	Yes
