

Steel Key Lock Safe for Valuables

This safe is designed for the secure storage of valuables and documents. It is constructed with robust steel and features a key lock mechanism and adjustable shelving.

Product Overview

Secure Storage Solution

The MT-60 steel safe is a professional-grade security unit designed to protect valuable items and sensitive documents. Built with a robust steel construction, it features a heavy-duty 55mm body and 15mm door for superior resistance. This secure storage solution is ideal for office or home environments requiring reliable protection against unauthorized access.
