

Steel Mesh Utility Cart with Pneumatic Tires

This steel mesh utility cart has a 440lbs loading capacity for moving heavy loads of dirt, rocks, wood, and equipment. It is designed for landscaping, home improvement, and multiple other tasks.

Overview

Versatile Mesh Utility Cart

This steel mesh utility cart is designed for efficient material handling in lawn, garden, and farm environments. Its robust steel frame and mesh bed design allow it to transport heavy loads with ease, significantly reducing physical strain on the operator. Equipped with pneumatic tires, it ensures smooth maneuverability across diverse terrains, making it an essential tool for professional landscaping and hauling tasks.
