

Steel Pressure Sprayer for Pest and Weed Control

This steel pressure sprayer is designed for pest control, weed control, and cleaning applications. It is constructed from high-quality stainless steel and offers resistance to corrosion.

Product Overview

Professional Grade Steel Pressure Sprayer

This robust pressure sprayer is expertly engineered for professional-grade pest and weed control applications. Constructed from premium stainless steel, the unit provides superior resistance to corrosion and ensures longevity in demanding work environments. Designed for efficiency, it features an intuitive pump handle system, an integrated pressure gauge for precise control, and a versatile adjustable nozzle for tailored application.

Technical Specifications

Suitability

Professional Use • Home Use

Material	Stainless Steel
Primary Applications	Pest Control, Weed Control, Cleaning

Design Features

Ease of Use

- Wide opening for efficient filling
- Easy-clean tank design
- Manual pump handle for pressurization
- Integrated pressure monitoring gauge
- Adjustable spray wand nozzle
