

# Steel Rebar Cutter

This steel rebar cutter is designed for efficiently cutting steel reinforcement bars (rebar) on construction sites. The cutter's durable construction ensures long-lasting performance and clean, precise cuts.

## ADDITIONAL IMAGES

## Overview

### Heavy-Duty Rebar Cutting Solution

This GQ40 heavy-type rebar cutting machine is engineered for high-performance steel processing on demanding construction sites. Designed to handle round steel bars up to 40mm in diameter, it provides clean, precise cuts to enhance job site productivity. The electric 380V system ensures reliable operation, while its robust construction guarantees long-lasting durability even under intensive use.

## Technical Specifications

### Machine Type

Heavy Duty • Electric

### Max Cutting Diameter

40 mm

### Voltage

380V

## Features

### Capabilities

- Precision cutting mechanism
- Durable industrial construction
- Integrated wheels for maneuverability
- Safety-focused operation
