

Steel Roll Container with Powder Coating

This steel roll container features a powder-coated finish for enhanced corrosion resistance and longevity. It is equipped with heavy-duty casters and a hinged gate for convenient loading and unloading.

Product Overview

Versatile Material Handling Solution

This steel roll container is designed to streamline logistics and material handling across various sectors, including the food, textile, and service industries. Featuring a durable powder-coated steel construction, it offers excellent corrosion resistance and long-term reliability for demanding warehouse environments. The unit is fully collapsible when not in use, maximizing storage efficiency, and includes a secure latching mechanism to ensure the safety of sensitive goods during transport.

Technical Specifications

Material & Finish	Steel with powder coating
Key Features	Collapsible, Secure Latching, Corrosion Resistant, Mobile

Applications

Suitable Industries

- Food Industry
- Textile Sector
- Service Industry
- General Warehousing

Primary Benefits

Space Saving • Easy Maneuverability • Enhanced Security • Customizable Design
