

Steel Roller Chain Sprocket 40 Teeth 1/2 Inch Pitch

This steel roller chain sprocket features 40 teeth and is designed for use with ANSI No. 40 roller chains. It has a 1/2" pitch and is suitable for single-strand chain configurations.

Product Overview

Industrial Roller Chain Sprocket

This finished bore roller chain sprocket is engineered for precision power transmission in industrial machinery. Designed for use with ANSI No. 40 roller chains, it features a robust steel construction that ensures durability and consistent performance. The finished bore design allows for efficient, secure installation onto shafts, making it an ideal component for demanding mechanical applications.

Technical Specifications

Number of Teeth	40
Pitch	1/2 inch
ANSI Compatibility	No. 40
Strand Configuration	Single Strand

Construction

Material	Steel
Bore Type	Finished Bore

Key Features

Highlights

Finished Bore • Steel Construction • ANSI Standard • Single Strand
