

Steel Roofing Tile Roll Forming Machine

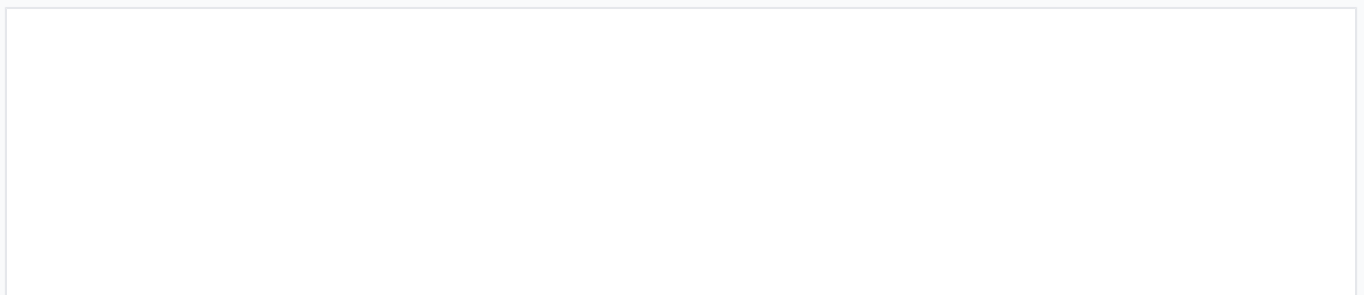

This machine is easy to operate and features remote control. It includes lifetime video online service.

ADDITIONAL IMAGES

Product Overview

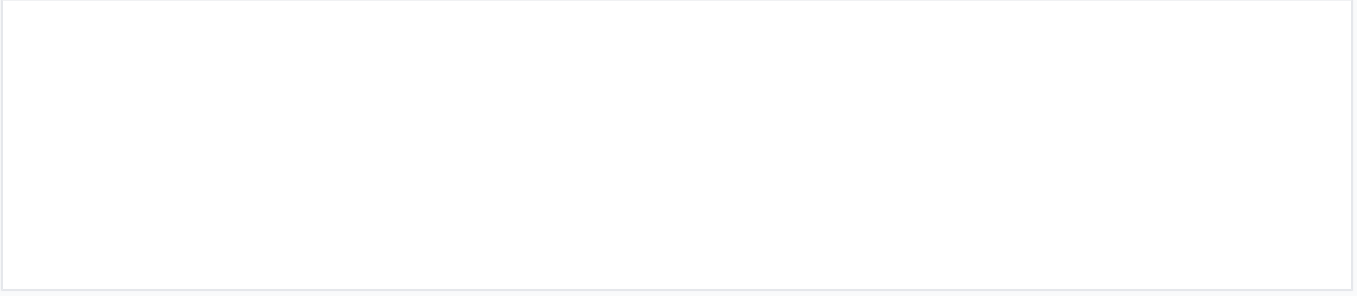

Overview of integrated feeding, forming, and cutting systems.

Professional Roofing Tile Production

This steel roofing tile roll forming machine is engineered for high-precision manufacturing, offering robust construction for industrial-scale operations. It supports automated control via PLC and touch-screen interfaces, ensuring consistent quality and high output. Designed for ease of use, it also features remote control capabilities and dedicated support services.

Technical Parameters

Hydraulic cylinders provide precise control during the metal forming process.

Material Specifications

Property	Value
Type	Pre-painted & galvanized steel coil
Thickness	0.3-0.6mm
Yield Stress	Q235-345 Mpa

Performance Metrics

5.5 KW Main Motor Power	12 Mpa Hydraulic Pressure	5.5 KW Hydraulic Motor Power
-----------------------------------	-------------------------------------	--

Forming Speed: 2-3; 5-6 m/min

Mechanical Construction

Precision engineered frame and rollers for durable tile production.

Detail of the chain drive system and heavy-duty support structure.

Roller Specifications: #45 steel with hard chrome treatment

Transmission: Chain transmission

Automation & Control

Control System: PLC
Interface: Touch screen and button

Logistics

Dimensions: 8000 x 1500 x 1500 mm
Weight: 8000 KG

Compliance

Ensuring quality compliance and secure preparation for shipping.

Certifications

CE, SGS
