

Steel Shaft Screwdriver with Ergonomic Handle

This screwdriver features a high-quality blade made of CR-V steel. It is designed for efficient and reliable performance in various fastening applications.

Product Overview

Professional Ergonomic Screwdriver

This precision screwdriver is designed for high-performance fastening applications, featuring a robust steel shaft for durability and longevity. The ergonomic handle is engineered from environmental materials, ensuring both user comfort and a reduced ecological footprint. With its optimized grip and control, this tool provides reliable performance for various professional manual tasks.

Technical Specifications

Shaft Length	100 mm
Tip Size	2.5 mm

Features

Primary Benefits

- Ergonomic handle for enhanced grip
- Durable steel shaft construction
- Eco-friendly manufacturing materials

Material Composition	Environmental Materials, Ergonomic Design
