

Steel Shovel Head for Digging and Landscaping

This shovel head is made from high-strength steel, ensuring durability and resistance to wear. It features a robust socket designed for secure handle attachment, making it suitable for gardening, construction, and landscaping.

Product Overview

Versatile Professional Shovel Head

This high-strength steel shovel head is engineered for demanding digging, landscaping, and construction applications. It features a robust socket design that ensures a secure and stable connection to any standard handle. Built for durability and wear resistance, it provides reliable performance in professional environments.

Technical Specifications

Material Composition	High-strength steel
Primary Applications	Gardening, Construction, Landscaping, Material Handling

Design Features

Key Performance Features

- High wear resistance
- Durable steel construction
- Secure socket mounting
- Versatile professional design

Handle Attachment	Robust heavy-duty socket
