

Steel Shovel Head for Gardening

This shovel head is constructed from high-quality steel for strength and longevity. It features a smooth, ergonomic design for efficient soil penetration and reduced user fatigue.

Product Overview

Robust Steel Shovel Head

This durable and robust shovel head is engineered for professional gardening, digging, and landscaping tasks. Constructed from high-quality steel, it offers exceptional strength and long-term reliability in demanding environments. The ergonomic design ensures efficient soil penetration, helping to reduce user fatigue during intensive operations. It is compatible with standard handles, providing easy assembly and versatility for various professional site requirements.

Technical Details

Material	High-quality steel
Design Features	Ergonomic, Robust, Soil-penetrating

Compatibility & Use

Primary Applications

- Digging
- Planting
- Landscaping

Handle Compatibility	Standard shovel handles
