

Steel Sleeve Anchor for Concrete

This sleeve anchor is engineered for reliable fastening in concrete, brick, and block. Its pre-assembled build ensures quick installation and consistent holding power for various applications.

Product Overview

Professional Grade Sleeve Anchor

This heavy-duty steel sleeve anchor is engineered for reliable, high-performance fastening into concrete, brick, and block substrates. The pre-assembled design ensures rapid and efficient installation on the job site. Built for durability, it features a corrosion-resistant finish that provides long-lasting holding power for structural components and heavy machinery.

Technical Specifications

Material Composition	High-quality steel
Finish	Corrosion-resistant
Compatible Substrates	Concrete, Brick, Block

Performance Features

Installation Benefits

- Pre-assembled design
- Quick installation
- Consistent holding power

Application Areas

Fixtures • Machinery • Structural Components
