

Steel Strap Pulley for Agricultural Machinery

These high-strength steel strap pulleys are designed for various agricultural machinery applications. The pulleys feature durable steel construction for reliable performance and extended lifespan.

Product Overview

Precision Steel Strap Pulleys

These high-strength steel strap pulleys are engineered specifically for demanding agricultural machinery applications. Designed for durability and reliable long-term performance, they provide consistent operation in challenging field conditions. The versatile design makes them an ideal choice for critical equipment, including harvesters, planters, and irrigation systems.

Technical Details

Applications

- Harvesters
- Planters
- Irrigation systems

Available Part Numbers

P2152, P2154, P2252, P2253, P2254

Material

High-strength steel
