Product Overview

Industrial Material Handling Solution

This durable steel table trolley is designed for high-efficiency logistics, manufacturing, and retail environments. It provides a robust, mobile solution for transporting and storing materials, helping to maximize production space through its stackable, space-saving design. Engineered for worker safety and long service life, it features a reliable electrostatic spray finish that ensures durability in demanding professional settings.

Construction Material

Steel, Electrostatic Spray Finish, Wire Mesh, Reinforced Frame

Key Features

Operational Advantages

- High mobility via four smooth-rolling castors
- Stackable design to optimize floor storage space
- Integrated label plate for easy content identification
- Electrostatic spray coating for extended service life
- Reinforced construction for worker security
