

Steel Wheel for Construction Machinery

This durable steel wheel is designed for construction machinery. It is engineered for robust performance and reliability in demanding environments.

Product Overview

Industrial-Grade Steel Wheel

This durable steel wheel is expertly engineered for construction machinery and demanding off-road environments. It features a reinforced structure designed for high load-bearing capacity and superior resistance to deformation. With a corrosion-resistant finish, it offers long-lasting protection and reliable performance in harsh conditions.

Technical Specifications

Supported Applications	Off-Road, Truck, Industrial, Agricultural, Construction Machinery
Construction Standard	APW Wheel

Quality Assurance

Key Performance Indicators

- Reinforced structural design
- High load-bearing capacity
- Corrosion-resistant protective finish
- Deformation resistant
