

Steel Wheel Rim for Heavy-Duty Vehicles

This steel wheel rim is designed for heavy-duty vehicle applications. It features a durable metallic finish and robust construction for reliable performance under demanding conditions.

Product Overview

Industrial-Grade Steel Wheel Rim

Engineered for demanding heavy-duty vehicle applications, this steel wheel rim offers robust construction and high durability. It features a precise design with multiple bolt holes and a central hub opening, ensuring reliable performance in industrial machinery and automotive assemblies. The durable metallic finish provides enhanced resistance, making it suitable for rigorous operational environments.

Technical Specifications

Key Design Features

- Multiple bolt hole configuration
- Central hub opening
- Durable metallic finish
- Robust construction

Material	Steel
Suitable Applications	Heavy-Duty Vehicles, Industrial Machinery, Automotive Assemblies
