

Steel Wheelbarrow with Pneumatic Tire

This wheelbarrow is constructed with a deep steel tray and a sturdy steel frame. It features a single pneumatic tire, providing smooth maneuverability across different terrains.

Overview

Heavy-Duty Steel Wheelbarrow

This robust wheelbarrow is engineered for demanding tasks in gardening, construction, and general material handling. It features a deep, high-capacity steel tray supported by a reinforced steel frame, ensuring long-term durability under heavy loads. Equipped with a reliable pneumatic tire, it offers smooth maneuverability across uneven terrain, making it an essential tool for professional and residential worksites.
