

Steel Wire Mesh Roll Container for Cargo Storage

This industrial roll container is constructed from durable metal steel wire mesh. It is designed for efficient cargo storage and transportation in warehouses, distribution centers, and manufacturing facilities.

Product Overview

Versatile Cargo Storage Solution

This steel wire mesh roll container is designed to optimize material handling and storage efficiency across various industries. Featuring a 4-sided design with a convenient half-fold door, it provides secure and organized transport for both fragile and bulk goods. The robust construction helps prevent product damage while maximizing warehouse space utilization and flexibility during seasonal fluctuations.

Design & Features

Key Operational Benefits

- Reduces handling time
- Prevents product damage
- Ensures cargo stability
- Supports efficient warehouse planning
- Adaptable to seasonal fluctuations

Construction

4-sided steel wire mesh with half-fold door

Safety Features

Base fastener, Stability lock, Protective paneling

Applications

Industry Suitability

Service Industry • Food Industry • Textile Sector • Warehousing • Distribution
