

Steel Wire Rope for Lifting

This steel wire rope is designed for heavy-duty lifting and rigging applications. Its multiple strands of high-tensile steel wires offer durability and resist abrasion and corrosion.

Product Overview

Professional Lifting Solution

This high-strength steel wire rope is engineered for demanding heavy-duty lifting and rigging applications across industrial sectors. Constructed from multiple strands of high-tensile steel, it offers superior durability alongside excellent resistance to both abrasion and corrosion. Designed for reliability, this rope ensures a long service life even in the most challenging operational environments.

Technical Specifications

Performance Features

- High-tensile strength
- Abrasion resistance
- Corrosion resistance
- High durability

Material Composition	High-tensile steel
Construction	Multi-strand twisted steel wire
Common Applications	Cranes, Hoists, Elevators, Industrial Machinery

Availability

Customization Options

Variable Diameter • Custom Lengths
