

Steel Wire Rope for Lifting and Hoisting

This high-strength steel wire rope is designed for various industrial and engineering applications. It offers excellent corrosion resistance and is suitable for lifting, hoisting, and securing heavy loads.

ADDITIONAL IMAGES

Product Overview

Professional Steel Wire Rope

This high-strength galvanized steel wire rope is engineered for demanding industrial and engineering lifting and hoisting applications. It features a multi-strand construction using high-tensile steel wires to provide superior durability, flexibility, and resistance to abrasion. Designed to ensure reliable performance and safety, it is an essential component for cranes, elevators, and complex rigging systems.

Physical Properties

Design Features

Galvanized, High-Tensile Steel, Multi-strand, Corrosion Resistant

Applications

Ideal Applications

- Industrial Lifting
- Hoisting Equipment
- Cranes
- Elevators
- Rigging Systems
- Heavy Load Securing
