Product Overview

Professional Grade Abrasive Steel Wool

This premium steel wool is engineered for high-performance cleaning, polishing, and surface preparation across diverse materials. Crafted from fine, continuous strands of metal fiber, the product ensures consistent abrasion for professional and DIY projects alike. It is highly effective at removing paint, rust, and surface imperfections from both wood and metal substrates.

Certifications & Compliance

Certifications

ISO, MSDS, BSCI, Sedex, QMS

Technical Details

Primary Applications

- Surface preparation
- Metal polishing
- Wood refinishing
- Rust removal
- Paint stripping

Versatility

Professional Use • DIY Compatible • Multi-Surface
