

Steering Column Assembly

This steering column assembly is a critical component in a vehicle's steering system. It connects the steering wheel to the steering gear, which allows the driver to control the direction of the vehicle.

Product Overview

Steering Column Assembly

This steering column assembly is a critical component designed for precision vehicle control. It seamlessly connects the steering wheel to the steering gear, ensuring smooth and responsive handling. Engineered for safety and comfort, this assembly includes essential parts like the steering shaft, universal joints, and mounting brackets to maintain optimal driver control.

Technical Specifications

Included Components

- Steering shaft
- Universal joints
- Mounting brackets

Primary Function

Steering System, Driver Safety, Precision Handling
