

Steering Rack End for Mercedes-Benz

This rack end is a crucial component in the steering system, connecting the steering rack to the tie rod end. It transfers steering input from the steering wheel to the wheels, providing precise steering control.

Product Overview

Precision Steering Component

This steering rack end is engineered to serve as a critical link between the steering rack and the tie rod end within the vehicle steering assembly. It is designed to facilitate the seamless transfer of steering inputs from the steering wheel to the wheels, ensuring responsive and precise maneuverability. Crafted from high-strength materials, this component is built to withstand significant stress, offering exceptional durability and wear resistance for long-term safety and performance.

Technical Specifications

Core Functions

- Connects steering rack to tie rod end
- Transfers steering inputs to wheels
- Facilitates precise steering control

Construction Features

High-Strength Material • Wear Resistant • Precise Threading

Part Number	2103380415
Compatibility	Mercedes-Benz
