Product Overview

Precision Steering Performance

This high-performance steering rack is specifically engineered for Volkswagen Polo and Skoda Fabia models. Featuring an integrated double sensor system, it provides enhanced steering control and precise feedback for improved vehicle handling. Constructed from durable materials, this unit acts as a direct replacement part, ensuring a straightforward installation process and long-lasting operational reliability.

Technical Specifications

Connection Types

- M16x1.5 (Outer)
- M14x1.5 (Inner)
- M14x1.5 (Additional connection)

Total Length

1178 mm

Input Shaft Dimensions

17.4mm diameter, Z=22 spline

Compatibility & Market

Target Markets

Africa, Eastern Europe, North America, Middle East, Southeast Asia, Oceania, Latin America
