Product Overview

Precision Steering for VW Eurovan and T5

This high-performance steering rack is specifically engineered for Volkswagen Eurovan and T5 models produced between 2005 and 2010. Featuring an integrated sensor, this component ensures precise steering control, enhanced responsiveness, and optimal feedback to the vehicle's electronic control unit. It is built to meet or exceed OEM standards, providing a durable solution for both standard and power steering systems.

Technical Specifications

Port Configuration

Port Type	Threading
