

Steering/Suspension System Mounting Bracket

This black-painted metal bracket provides multiple mounting points. It is suitable for use in steering or suspension systems, and includes a cylindrical section designed for pivoting or rotating functions.

Product Overview

Steering and Suspension Mounting System

This high-durability metal mounting bracket is engineered for critical steering and suspension applications. Featuring a robust black-painted finish, it offers excellent corrosion resistance and long-term mechanical reliability. The design integrates a specialized cylindrical section with precision-fitted bushings to ensure smooth pivoting and rotation under load.

Technical Details

Key Components

- Multiple mounting points
- Cylindrical housing with integrated bushings
- Fastening nut and bolt assembly
- Curved structural arm

Finish	Black-painted metal
Application Compatibility	Steering System, Suspension System, Mechanical Assembly
