

Step-Through Electric Bicycle with Storage

This electric bicycle has a step-through frame, making it easy to mount and dismount. It is equipped with a front basket and rear rack for carrying items.

Overview

Efficient Urban Mobility

This step-through electric bicycle is designed for convenient urban transportation, featuring an accessible frame geometry that allows for easy mounting and dismounting. Equipped with an integrated electric motor, it provides assisted pedaling to help riders navigate commutes with less effort. The inclusion of both front and rear storage solutions makes it a practical choice for carrying groceries, personal items, or daily essentials.
