

Step-Through Frame City Bicycle

This compact bicycle features a step-through frame design, suitable for urban commuting and recreational use. It is equipped with a comfortable saddle, front and rear fenders for protection against splashes, and a rear carrier rack for carrying small items.

Product Overview

Urban Commuting Solution

This compact step-through frame bicycle is engineered for optimal convenience in urban environments. Featuring an upright riding posture and a low-maintenance single-speed drivetrain, it offers a practical and comfortable experience for daily commuting or recreational riding. The lightweight construction ensures excellent maneuverability, while the included fenders and rear rack add essential utility for carrying small items.
