

Step-Through Frame City Bicycle

This step-through frame city bicycle is designed for comfortable urban riding. It features a sprung saddle, rear rack, full mudguards, and upright handlebars for an ergonomic riding position.

Overview

Urban Comfort and Reliability

This step-through frame city bicycle is engineered for comfortable urban commuting and leisurely rides. Featuring a durable steel frame and a reliable 6-speed drivetrain, it offers a smooth and efficient riding experience across varied city terrain. With practical additions like a rear rack and full mudguards, this bike is a versatile solution for daily transportation needs.
