

# Step-Through Frame Electric City Bike with Lead-Acid Battery

This electric city bike is designed with a step-through frame for easy access. It utilizes a lead-acid battery to provide power for city commuting and recreational use.

## Overview

### Efficient Urban Commuting

This step-through electric city bike is designed for convenient and comfortable urban transportation. Featuring a reliable 250W brushless motor and a 1:1 pedal assist system, it offers a smooth ride for daily commuting or leisure. The bike is equipped with a Shimano 6-speed derailleur and essential safety features like V-brakes, making it a versatile choice for city environments.

## Performance

### Motor Power

**250 W**

Motor Output

**24 V**

Voltage

Maximum Speed	25 km/h
Full Charge Distance	45 km
Climbing Ability	12 °

## Technical Specifications

Battery Details	24V 12Ah Lithium Battery
Charging Time	4-6 Hours
Drivetrain	Shimano 6 Speed
Net Weight	24 kg
Rated Loading	150 kg

## Logistics

### Container Loading Capacity

Configuration	20ft Container	40ft Container
95% Load	48	96
75% Load	80	180

Packing Dimensions	1900 x 280 x 880 mm
